Projects

VividSpace

User Centered design project where I developed user profiles, interviews, surveys, wireframes and a feature/function matrix to determine our focus in the market. Conducted interaction and task analysis to determine what features needed to be improved on and a functional prototype within Unity.

Flashcard App Wireframe

Developed with an emphasis on elegant design and functionality, with the color palette chosen to encourage a soft and pleasent experience. Showcases each screen in the studying process that includes a Next screen, Randomized screen, and a text form box for the user to create their own flashcards.

Exercise Application

Designed a functional exercise application that centers around 4 core exercises. This app includes a stopwatch function, "suggested" exercise function, and a repetition counter.

Quiz Application

App supporting True/False, Multiple Choice, and Multiple Answer formats, with a focus on user-friendly interface and cross-platform performance optimization.
